## Lift/Turn Valves for Burning Gases

### GENERAL INFORMATION

#### Materials

BROEN-LAB UniFlex™ Lift/Turn fittings are manufactured of the highest quality materials, primarily brass. The surfaces of all fittings are finished in the chemically resistant BROEN-LAB POLYCOAT.

#### Installation and technical tables

Special requirements of your local Gas board should be checked before commencing installation. All pipe work should be purged to ensure cleanliness before fitting.

#### Special advantages

The laboratory fittings from BROEN-LAB are designed and manufactured with the requirements of a modern laboratory in mind.

The hallmarks of these fittings are good performance, durability, easy operation,

flexibility and streamlined design, along with an easy-to-clean and attractive appearance.

Fittings from BROEN-LAB are ideal for all types of laboratories, and are delivered with easy-to-mount fixing items/mounting kit, that will keep the fitting fully locked in its position when installed. Consequently, the fitting will not turn unintentionally, which would result in leaks.
